## What can Pakistan do to achieve sustainable population growth?

- **Promote public discourse** on population dynamics as a core element in economic and social development.
- **Increase spending** on population services: Pakistan's current spending of \$ 1.0 per capita should be doubled to eliminate unmet need.
- All private sector providers and outlets of the health departments must provide family planning services to **improve access and information**.
- Sustain **political commitment** and increased **accountability** to ensure that the system is delivering and meeting the family planning needs of the constituents.
